

Cadastur vs CNPJs

DATA SCIENCE IMPROVES TOURISM

The Idea:

Result is a list with data on companies involved in tourism without registration in the CADASTUR

Definitions

The Idea is finding the result of crossing the two data sources, CNPJ and Cadastur, and discover what should be in Cadastur but is not.

Cadastur

CNPJ's

Data Science

Cadastur is: The Register of Tourist Service Providers, from the Ministry of Tourism, is the register of individuals and legal entities that work in the tourism sector.

CNPJ is the acronym for "National Register of Legal Entities". This is a unique identification number assigned to each legal entity, that is, to companies and other commercial entities in Brazil. This number is used for registration and control purposes of economic and tax activities.

Two lists of two Brazilian federal Entities that have never met.
One about tourism and the other for Legal Entities.

Cadastur Original Data:

Cadastur Is federal Entity, but it has organs in the State and also Counties, to take care of the tourism in Brazil.

The companies the work with tourism are obligated to do they're on register at the Cadastur.

These registers, make the CADASTUR.

The data size is: 63,9 MB

15 entities list each one with their data characteristic.

To make a Registration: <https://cadastur.turismo.gov.br/hotsite/#!/public/capa/entrar>

Cadastur Original Data:

The Data at CADASTUR is open.

- CADASTUR - Tourist Camps
- CADASTUR - Travel Agencies
- CADASTUR - Entertainment Venues and Tourist Animation Equipment
- CADASTUR - Convention Centers
- CADASTUR - Support for Nautical Tourism or Sport Fishing
- CADASTUR - Entertainment and Leisure Ventures and Water Parks
- CADASTUR - Gastronomy
- CADASTUR - Tour Guides
- CADASTUR - Organizers of Tourist Events
- CADASTUR - Event Infrastructure Services Providers
- CADASTUR - Theme Parks
- CADASTUR - Specialized Tourism Services Providers
- CADASTUR - Tourist Transporters
- CADASTUR - Accommodation Facilities
- CADASTUR - Tourism Service Providers - Vehicle Rental

All data is here:

<https://dados.gov.br/dados/conjuntos-dados/>

CNPJ Original Data:

The List of "National Register of Legal Entities" - all companies in Brazil are on this register.

CNPJ is a registration issued by the Federal Revenue Service when opening a company. The CNPJ number is used to identify the business in various activities, such as issuing invoices and paying taxes.

This data collection has more than 22GB

The data need a "Dictionary of the National Register of Legal Entities", to make sense, it's totally different of the CADASTUR

Original Data: <https://dados.gov.br/dados/conjuntos-dados/cadastro-nacional-da-pessoa-juridica---cnpj>

Data Understanding:

Data in all Cadasturs Bases
Número de Inscrição do CNPJ
Nome Fantasia
Tipo de Estabelecimento
Natureza Jurídica
Porte
Endereço Completo Receita Federal
UF
Município
CNAE(S) relacionados à atividade

All Cadastur bases have these information

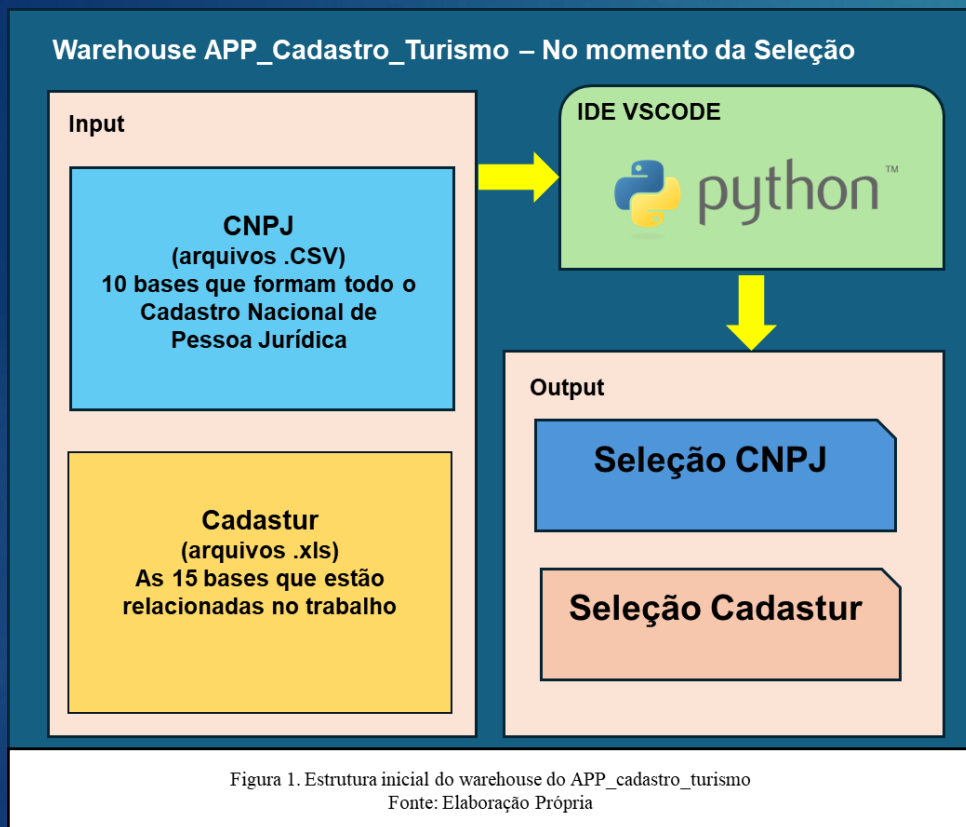

With the CNPJ base we can organize to have the same information

Important to know:

“CNAE(S) number related to the activity.

The CNAE is a National Classification of Economic Activities. It is the instrument of national standardization through codes of economic activity and framing criteria used by various tax administration bodies in the country.” – Source: <https://www.gov.br/empresas-e-negocios/pt-br/empreendedor/perguntas-frequentes/cadastur/o-que-e-cnae>

Stage 1 – Data Preparation:

Cadastur - Step 1 Transformation:

Load data from Excel spreadsheets

Rename columns

Separate CNAE

Format dataset

Save as .CSV

Data Size

Before: 55 MB

After: 40 MB

Results:

14 .csv file

CNPJ - Step 1 Transformation:

Load the data

Rename columns

Form complete CNPJ number

Remove unnecessary columns

Format CNAE

Filter: ACTIVE companies

Filter: CNAE Tourism

Organize Dataset

Save as .CSV

Data Size

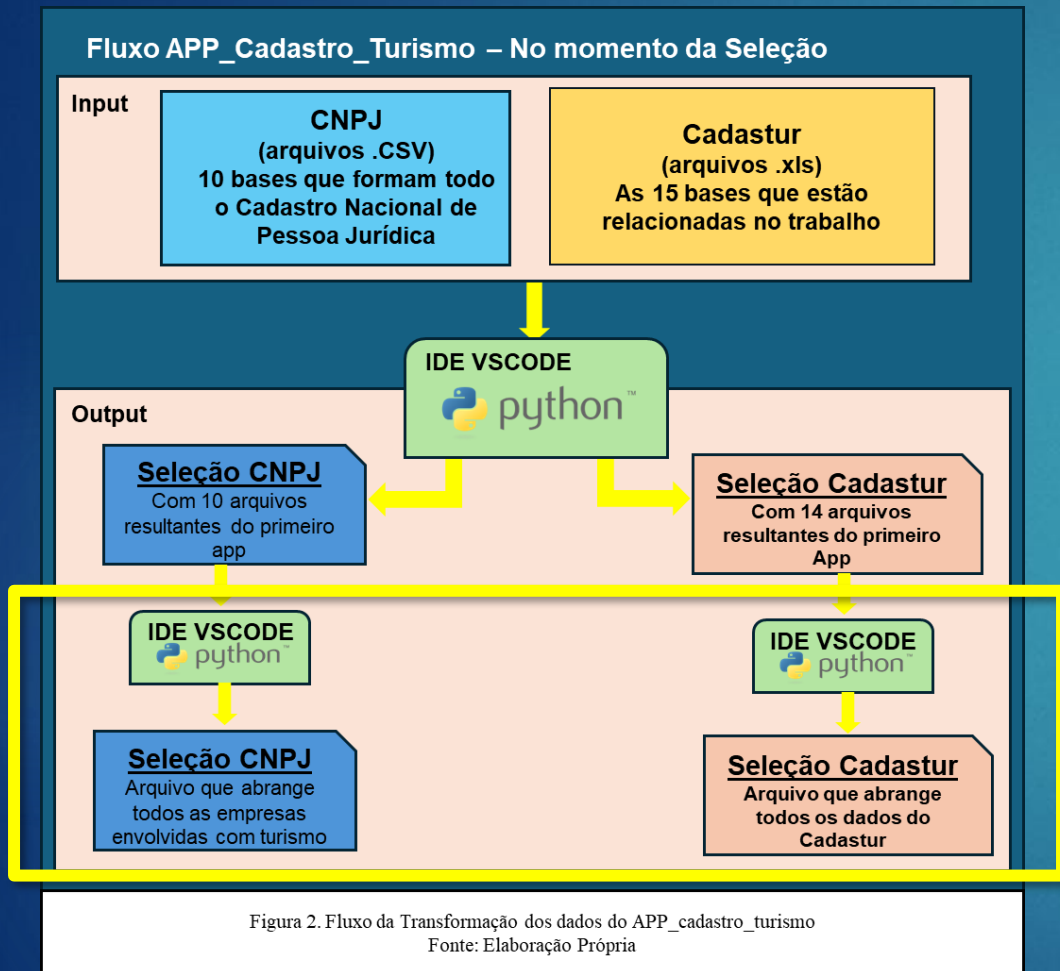

Before: 13 GB

After: 348 MB

Results:

9 .csv file

Stage 2 – Data Preparation:

Cadastur Step 2 Transformation:

Load 14 datasets
Remove unnecessary spaces
Transform 14 datasets in 1
Results:
1 .csv file with

Data Size
Before: 40 MB
After: 21 MB

CNPJ Step 2 Transformation:

Load 10 datasets
Remove unnecessary spaces
Transforms the municipality code into municipality
Transform 9 datasets in 1
Results:
1 .csv file with

Data Size
Before: 348 MB
After: 181 MB

Stage 3 – Data Preparation:

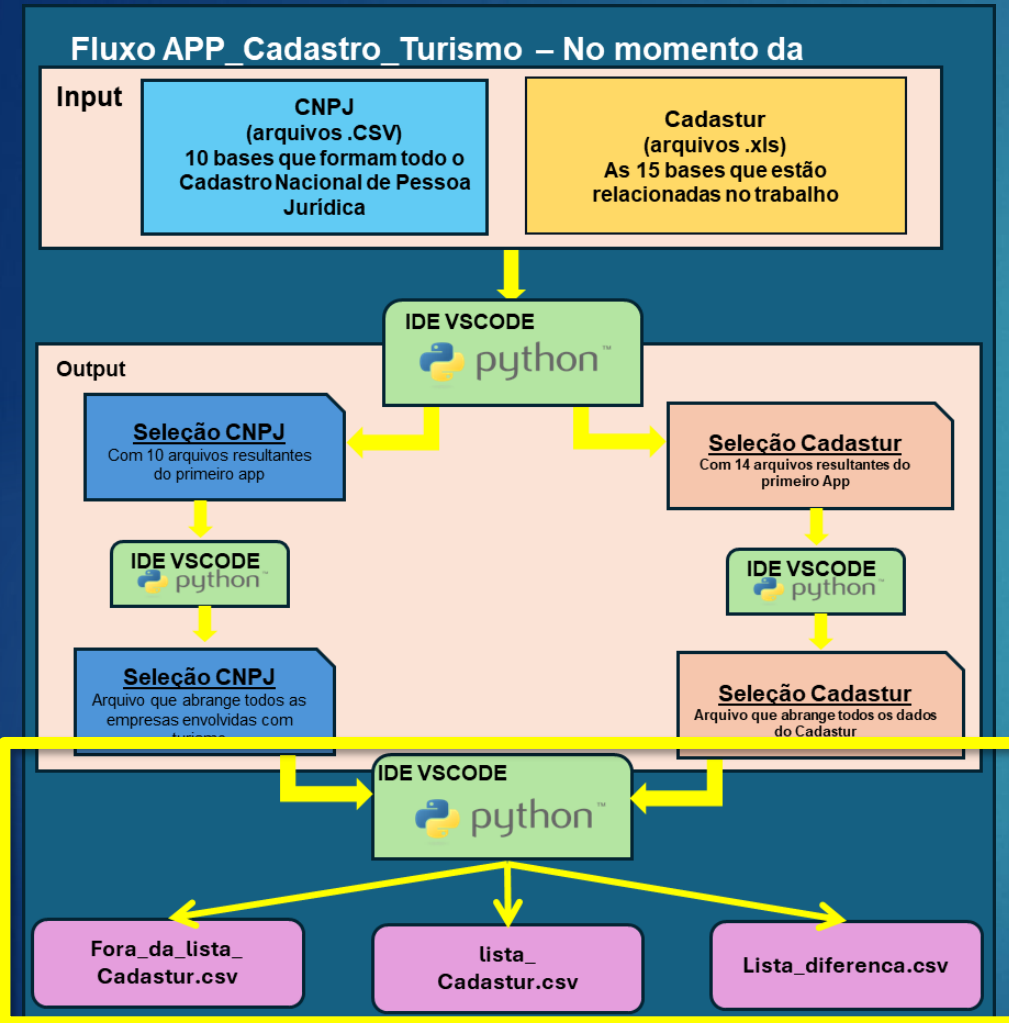

Figura 3. Fluxo da Transformação dos dados do APP_cadastro_turismo
Fonte: Elaboração Própria

Step 3 Transformation:

Load 2 datasets

Merge 2 datasets

Select and create 3 datasets

- df_merge – all data (Cadastur data + CNPJ data)
- df_results – CNPJ in CADASTUR
- df_list – CNPJ out from CADASTUR

Transform float in integer

Transform blank spaces in zero in 'CNAE', 'CEP', 'Empresas_ID' columns

Mapping – change acronym to state names

Upper case configuration

Results:

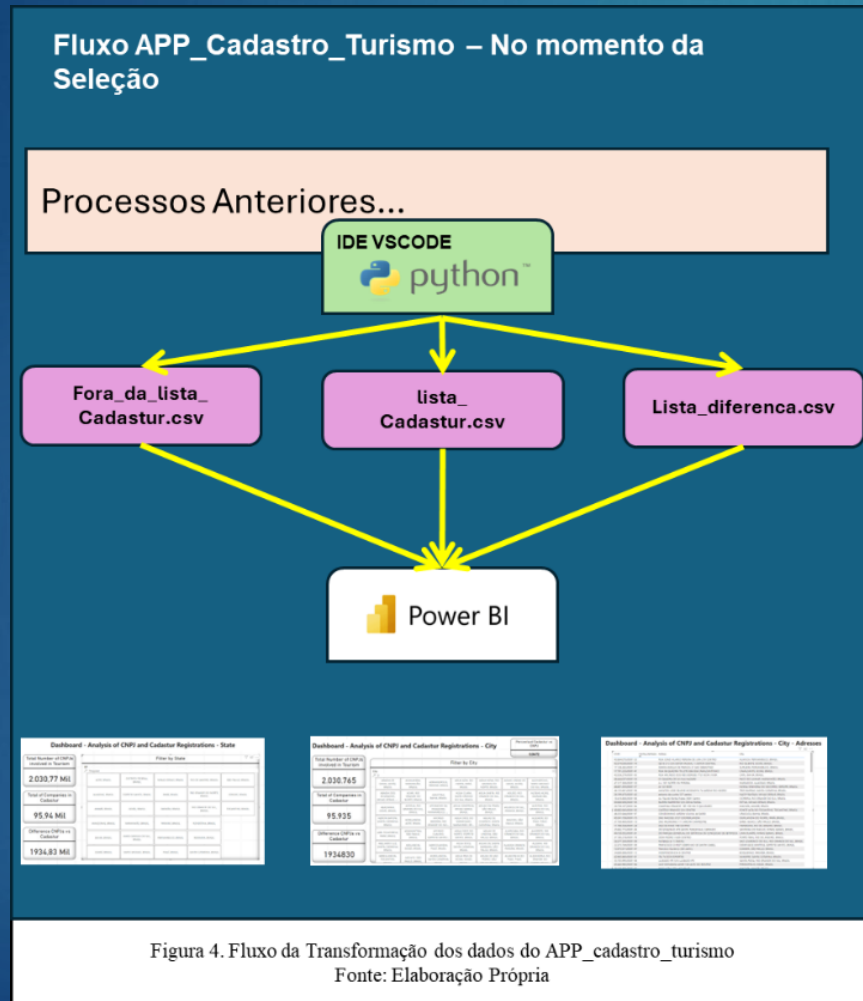

3 .csv file with

Data Size

Before: 348 MB

After: 528 MB

Stage 4 – Modelling Dashboard:

Step 4 Modelling & Dashboard:

Load 3 datasets

Modelling data

3 Dashboards

State

City

List Addresses

Results:

3 Power BI Dashboard

Dashboard

With the three files prepared we have:

Total number of CNPJs involved in tourism by state

Total Number of CNPJs involved in Tourism
2.030,77 Mil

Total registered CNPJ in CADASTUR

Total of Companies in Cadastur
95,94 Mil

Difference (companies that need to be included in the register)

Difference CNPJs vs Cadastur
1934,83 Mil

Finalmente temos a lista das empresas que
precisam se cadastrar no CADASTUR

Conclusion

- ▶ With the created system, we applied various filters for several cities in Brazil and found that a very low percentage of tourism-related companies are registered in Cadastur. For Exemple:
 - ▶ São Paulo/SP: only 4% of tourism-related companies are registered in Cadastur.
 - ▶ Salvador/BA: only 3.72% of tourism-related companies are registered in Cadastur.
 - ▶ Rio de Janeiro/RJ: only 4.51% of tourism-related companies are registered in Cadastur.
- ▶ Given the alarming data about the low adoption of tourism companies in Cadastur, the implementation of the **Business Location Service** becomes urgent and relevant. The proposed initiative aims not only to identify and regularize non-registered businesses but also to strengthen the Brazilian tourism sector as a whole.
- ▶ The outlined objectives for the Business Location Service - identifying non-registered companies, supporting inspections, promoting legality, increasing security for tourists, optimizing efficiency in inspections, fostering economic development, and contributing to Cadastur transparency - are essential to overcome the challenges faced by the sector. Despite being a country full of unique attractions, beauties, rich history, and culture, Brazil receives very few visitors.
- ▶ it is crucial for responsible authorities to recognize the pressing need for action and mobilize efforts to encourage registration, utilizing the Business Location Service for companies that should be in Cadastur. By doing so, they will not only strengthen the tourism industry in Brazil but also ensure a safer and more transparent experience for tourists, while boosting economic development and regulatory efficiency practices.

Agradecemos!
